100% Active Ingredients: Bakel Skincare

I love the evolution of skincare, and when I found out about the Italian brand **Bakel**, I was intrigued by its brand simplicity to **use only 100% active ingredients**.

Bakel is based on unique technology, enabling its products to be formulated as fluids without the addition of any preservatives, colorants, emulsifiers or fragrances. Each product delivers **100 % pure skin nutrition in a highly absorbable format**, facilitated by a manipulation of each ingredient's **molecular size**

There are six formulas in the facial fluid range, which each target a different facet of skin. **Jalurois** is my favorite as I am a big fan of products that contain **hyaluronic acid** which encourages high levels skin hydration. The remaining five lines include **Lactobion**, **collagen**, **Q10-B5**, **VIT E-A** and **Malic**. Each formula can be used on its own, or in a routine in combination with other formulations.

This sounds like such a good idea! Maybe it will be my next skincare purchase...
