#### MEET BAKEL

Meet Bakel

FLORENCE – This weekend, I also caught up with the very talented cosmetic scientist and creator of bio-tech skincare line [Bakel](#), Dr Rafaella Gregori. She'd just returned from a whirlwind tour of our US stores having spent the week training all our staff on both East and West coasts on her revolutionary line, which we've secured an exclusive on.

Despite Gregori's high-tech background, the concept behind her line is incredibly basic: Bakel is made with zero useless substances and 100% pharmaceutical grade active ingredients, packing serious benefits in every application.

It sounds so obvious, but no one – until now – has actually done it. The best ideas really are the simplest.
